Hello, Alan! And thank you. I appreciate you sending us this background information. We will be sure to review it prior to the Monday afternoon call. We also received your other email with the agenda. Looking forward to hearing your voice again; it has been a long time since we worked together on wastewater security!

Grace

Hi Grace/all,

I hope that you are doing well. I am currently working part-time for the Great Lakes Environmental Center.

I understand from Melissa McCoy that you will be on a call that has been arranged for Monday (3/3) to discuss an idea GLEC brought to NACWA, ACWA and WERF a short time ago to offer assistance with implementation of the revised ammonia criteria. Attached is some briefing material that GLEC prepared to help introduce the idea. In a separate e-mail I will forward the points we would like to cover on the call on Monday. We also have been in touch with Lisa Huff from HECD and have sent her the same information in advance of the call.

It will be good to reconnect - at least on the phone.

Best regards, Alan
